

# Data Summarization GUI Instructions

Download file (Google drive link):

[https://drive.google.com/file/d/1Y2i2WNI5KWAKk-gwGC\\_JamGrhM4hH1GA/view?usp=sharing](https://drive.google.com/file/d/1Y2i2WNI5KWAKk-gwGC_JamGrhM4hH1GA/view?usp=sharing)

## Notes:

1. The program (**mergetest.exe**) may be downloaded from the Google drive link above.
2. **Please note that this program can only be run on Windows.**
3. Because this program contains a Python kernel, it may be flagged as a Trojan virus by either your browser or your machine. You can attempt to work around this on your own, though you may need IT help to get it working.
4. After running the .exe file, it may take a moment for the GUI window to show up.

## Instructions:

1. “Zip file with data” to select the input zip file. **The software can only run when the input file with the name “HOSP10FY####.zip”. Replace the number signs with a year (e.g. 2019).**
2. “Output file location” selects where you want the output .csv to be saved to.
3. “Output file name” sets the name of the output file. **Do not include the .csv extension.**
4. “Working on” will show the current status of summarization process. It might take a little while to open the files.

If you have additional questions, please contact Alex Sietsema (sietsem6@msu.edu).
